

## Manual Nanolex Premium Textile & Leather Sealant

### **Product Description:**

Nanolex Premium Leather and Textile Sealant for car seat fabrics is based on chemical nanotechnology. A very thin transparent layer is formed on the fabric that protects the fabric against aqueous and oily soiling.

**This product can be stored for up to 24 months (in a dry, temperate stable environment)**

### **Consumption:**

appr. 40ml/m<sup>2</sup>

**Processing temperature:** 5-30°C - Avoid direct sunlight and/or high air humidity.

**The following steps are recommended to obtain the best results:**

### **Cleaning**

The fabric that is designated to be treated with the sealant should be clean and dust-free. Dirt has to be removed, if necessary use detergents and rinse with lots of water.

### **Application of Nanolex Premium Leather and Textile Sealant**

Nanolex Premium Leather and Textile Sealant can be applied by spraying or dipping.

Caution: If the product is sprayed on the fabric wearing of inhalation protection is necessary due to aerosol forming. Be sure of efficient exhaust.

### **Curing**

The sealant is fully cured after 24 h. No heat treatment is necessary.

### **Cleaning the car after the sealing was applied:**

The fabric can be cleaned with water. Don't use aggressive alkaline detergents. The impregnation is stable to mechanical abrasion, dry-cleaning and washing.

**Disposal:** regard your local rules and regulations

We do not take any responsibility or guarantee for a treatment that was not applied like shown in this manual. The user of is supposed to test the treatment at his own risk in an inconspicuous place in order to test if it is suitable.
